	* 1	1,081	(27)	440	00
Total ..	46	2,067	(853)	14,830	95

* Issued under loan permits.

(*c*) *When the balance if any will be distributed—Tanjore.*—The balance will be distributed for the ensuing Kuruvai cultivation according to demand. The stock will also be distributed from now onwards to ryots who are growing short term paddy under Uyyakondan channel irrigation and tank-fed irrigation in Sengipatty firka in Tanjore taluk.

Pattukkottai.—Due to propaganda on a wide scale, the response was better in the beginning but later waned due to the reasons, viz., this is a new practice in that area. The cultivators were afraid of reduced yield in the regular season, if no rest is given to the land. Though the cultivators were assured of sufficient water-supply up to the end of March 1958 and also told that enough pesticides have been stocked in the depots to meet all eventualities of pests and diseases, the cultivators were afraid that they would not get their requirements in full. It has also been reported that the cultivators were granted loans, but the parties did not come to the depot for taking the seeds.

Mayuram.—Out of the balance quantity of 3 tons and 810 lb., it is expected that about 2 tons would be left unsold. The ryots themselves have exchanged 22 tons of short duration paddy seeds for summer cultivation in this division.

Kumbakonam.—It is difficult to dispose of the balance quantity for the third crop in this season since the response from the ryots is not encouraging.
